Customer No. 27752

11. (currently amended) A cleaning kit comprising:

A. a container comprising a foam-generating dispenser for generating a foam comprising a gas imparting mechanism to form the foam selected from an air injection piston, foam-generating aperture, a mesh or net, a pump, and/or a sprayer, ~~more preferably, an air injection piston, a pump, an impinging surface, a mesh or net, and/or a sprayer~~ which injects or imparts air from the atmosphere into the dishwashing composition; and

B. a composition contained within the container, the composition being selected from the group consisting of a microemulsion and a protomicroemulsion, and the composition comprising:

i. a surfactant system; and

ii. a solvent consisting of water, ethanol and glycol ethers,

iii. a low water-soluble oil having a solubility in water of less than about 5000 ppm;

wherein when employed with the composition, the foam-generating dispenser generates a foam having a foam to weight ratio of greater than about 2 mL/g.

12. (cancelled)
